OBJECTIVE

Looking for a research opportunity that will allow me to utilize my problem-solving skills and scholastic knowledge to further develop my abilities in the field of computer science and evolve through continuous learning.

EDUCATIONAL QUALIFICATION

National Institute of Technology, Goa Bachelor of Technology
Computer Science & Engineering
May 2010 – May 2014
CGPA: 9.17/10

Sir Padampat Singhania Education Centre Higher Secondary Examination (10+2)
CBSE Board
March 2009
Marks: 91.04%

St.Anthony Sen. Sec. School Secondary School Examination
CBSE Board
March 2007
Marks: 82.07%

INTERNSHIP

CERN (European Organization for Nuclear Research), as a trainee at CMS Experiment

Project	:	Comparison of Luminosity Measurement Methods (hf and et-sum)
Duration	:	2 months (15May2013-15July2013)
Software	:	ROOT physics data analysis framework

WORK EXPERIENCE

Total 4 years of IT experience, being part of scrum teams in companies like Tesco Technology and Target Corporation. I have worked as a frontend and backend developer on various projects involving tech stack of NodeJS, ReactJS, MongoDB, GraphQL, AWS cloud and Java along with android app development and swift3

ENTERPRISE PROJECTS - TESCO

Store Empowerment

This project involved development of Tesco's Store Empowerment mobile application. Using this app store managers can view existing store orders, inventory information and if needed can place new orders. It also provided KPI data (Key Performance Indicators) of stores and helped customers in locating their product in store. For authentication service I used JWT (JSON Web Tokens) and built this server from scratch, running under IIS for scalability. Available at https://labs.ocset.net/smapp

Role	Server Developer
Platform / Framework	NodeJS (Express), Couchbase, JWT.IO, AWS
Responsibilities	Server API Development. Authentication and Authorization. Implementation of portal for in house distribution of apps.
Duration	1 Year 2 Months

MobiAssets

This project involved development of Tesco's MobiAsset mobile application for tracking mobile devices available for testing. User could register the device to server and allocate or de-allocate devices to his/her name and can view available/free devices within the team so that he/she can take more devices based on the needs.

Role	Android Developer
Platform / Framework	Native Android, Android SDK
Responsibilities	Android Network Operations and App layouts Unit Testing and code coverage using Mocha Automation using Supertest
Duration	4 Months

Tesco Clubcard and Grocery App

These are Tesco's customer facing apps. Digital Clubcard helps users to view their coupons, points and redeem the coupons. It also allows users to make payment using wallet, locate nearest stores using geofencing. Grocery shopping app allows customers to order/shop grocery and manage subscriptions. Clubcard, Grocery

Role	Clubcard : Hybrid app developer || Grocery: Swift iOS eveloper
Platform / Framework	Clubcard: AngularJS, Cordova , Ionic || Grocery: Xcode, Swift3
Responsibilities	Store locator using Google maps Javascript Integrating web view components within Native app. Native App development using Xcode
Duration	5Months

ENTERPRISE PROJECTS - TARGET

Personalization Features

This involved building Target dot com's recommendation page, which shows a personalized page based on customer's past shopping, loved products and relevant deals. Developed various sections like "pick up where you left off" allowing customer to resume shopping based on past product views, "deals for you" to show relevant deals, "new in popular categories" to provide category based recommendations.

Recommendations Page: https://www.target.com/yr

Role	ReactJS Developer
Platform / Framework	Javascript, ReactJS, Redux
Responsibilities	Designing algorithms to get relevant recommendations Front end ReactJS components
Duration	8 Months

Awesomeshop Feature

To leverage social networks like Instagram, we created a personalization feature called "Awesomeshop" which provides recommendation to customers by aptly integrating their loved products and trending Target products on Instagram. It also presents a real life (Instagram posted) image to other customers.
Section: "inspired by #TargetStyles" at https://www.target.com/yr

Role	ReactJS and GraphQL Developer
Platform / Framework	Javascript
Responsibilities	GraphQL implementation to combine TargetFinds (Instagram feed) and customer loved products
Duration	7 Months

Chatbots

To automate store order enquiries within target stores, we are building chatbots using botkit.ai. Helping store employees to query on the fly and if bot is not able to resolve the issue, we create a ticket which another team looks into. Thus reducing the number of tickets to be processed by humans.

Role	NodeJS Developer
Platform / Framework	Botkit.ai, axios, sentiment
Responsibilities	Create chat interface and API integration
Duration	5 Months

COLLEGE PROJECTS

Product Ranking using Opinion Mining and Sentiment Analysis : To compare multiple products based on user reviews posted on website via NLP(Natural Language Processing) and text analytics.

Implemented **Ricart Agrawala Algorithm** for Mutual Exclusion in Distributed Systems using Unix Sockets in C.

Simulated a 3D Robot Animation using **OpenGL**

Designed a mini **C preprocessor** using **flex** and **bison**

ACHIEVEMENTS / CERTIFICATIONS

AWS (Amazon Web Services) Certified Developer – Associate

Awarded 0.01% Merit Certificate for AISSCE 2010 in Information Practices (Visual Basic and Oracle) by CBSE

K.K Sancheti Endowment award for Academic Excellence in 2011

Represented Tesco Technology at AWS Conference 2016 - Singapore

Head of Software club at National Institute of Technology - Goa

Organized Ethical hacking workshop in college - 2014
